Financial Statements  
**December 31, 2006 and 2005**

March 27, 2007

## Auditors' Report

### To the Unitholders of the Diversified Investment Grade Income Trust, Series 1

We have audited the statements of net assets of **Diversified Investment Grade Income Trust, Series 1** as at December 31, 2006 and 2005 and the statements of operations and retained earnings, changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of the Trustee. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Trust as at December 31, 2006 and 2005 and the results of its operations, the changes in its net assets and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

Notes to Financial Statements

December 31, 2006 and 2005

---

## 1 Creation of Trust and nature of operations

The Diversified Investment Grade Income Trust, Series I (the “Trust”) is a closed-end income trust which was established under the laws of the Province of Ontario on September 16, 2002 by a trust agreement.

National Bank of Canada acts as administrative agent since October 16, 2006 (previously and in 2005 – National Bank Trust Inc.) and National Bank Financial Inc., the promoter of the Trust, holds no voting securities of the Trustee, Metcalfe & Mansfield Alternative Investments Corp.

In order to provide the Trust with the means to meet its investment objectives, the Trust entered on September 24, 2002 into a credit default swap agreement with a creditworthy financial institution (the “Bank”).

The Trust provides levered exposure to a portfolio containing 99 corporate credits (2005 – 99) (“reference entities”), the objective of which is to provide unitholders with a stream of quarterly distributions and redeem all outstanding units on October 9, 2007.

Through to the maturity date, the redemption price and the net asset value of the Trust will vary depending on a number of factors such as the quarterly distributions to be made on the units, interest rates, the creditworthiness of the reference entities and cumulative net loss amounts incurred upon the occurrence of credit events in the portfolio. Credit events include bankruptcy, failure to pay and restructuring of a reference entity. However, the Trust will not be exposed to a cumulative net loss greater than \$11,200,000.

## 2 Significant accounting policies

### Generally accepted accounting principles

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (the “Canadian GAAP”). The significant accounting policies are the following.

### Accounting estimates

The preparation of financial statements in accordance with GAAP requires the Trustee to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. The Trustee believes that the estimates used in preparing the financial statements are reasonable and prudent. Actual results could differ from those estimates.

### Short-term investments

Short-term investments are carried at the lower of cost and net realizable value, increased by related accrued interest.

# Diversified Investment Grade Income Trust, Series 1

Notes to Financial Statements

December 31, 2006 and 2005

---

## Income recognition

Interest income, interest expense and income from the credit default swap are recorded on an accrual basis.

## Valuation of the credit default swap

The credit default swap is presented in the statement of net assets at its estimated replacement cost with changes in the unrealized appreciation or depreciation for the year reported in the statement of operations. The replacement cost is estimated by using several assumptions, including the discounting of the expected contractual cash flows using a rate that reflects the credit quality of the reference entities of the swap. The replacement cost is strongly influenced by other assumptions such as the amount and timing of future estimated cash flows, discount rates, time value of money and yield curves. The estimated replacement cost reflects market conditions on a given date and for this reason cannot be representative of future fair values. Also, the replacement cost does not necessarily reflect the value at which the credit default swap could be liquidated.

## 3 Short-term investments

Under the credit default swap agreement, short-term investments are pledged to the Bank. They are issued or fully and unconditionally guaranteed as to principal and interest by the Government of Canada or a Canadian financial institution having a short-term or long-term rating from Standard & Poor's Rating Service of at least A1 or AA- and a short-term or long-term rating from Moody's of at least P-1 or Aa3 respectively. The amount outstanding as at December 31, 2006 has a maturity date of January 4, 2007 (January 5, 2006 as at December 31, 2005) and bears interest at 4.29% (2005 – 3.04%).

## 4 Financial derivative instrument

The Trust has entered into a credit default swap agreement with the Bank pursuant to which the Trust will pay the Bank if a credit event occurs in the reference entities. The maximum loss that could be assumed by the Trust for a credit event with respect to a reference entity amounts to \$1,120,000, up to a cumulative net loss of \$11,200,000.

The notional amount of the credit default swap as at December 31, 2006 is \$10,782,206 (2005 – \$10,782,206) for a portfolio that consists of a pool of \$110,880,000 (2005 – \$110,880,000) in reference bonds of 99 (2005 – 99) equally weighted entities that had average Moody's ratings of Ba1 and Baa3 on December 31, 2006 and 2005 respectively. The credit default swap will mature on September 24, 2007. The net quarterly payments under the swap are based on:

- a) a quarterly payment by the Trust to the Bank based on a banker's acceptance three-month rate on the collateral amount outstanding on the immediately preceding quarterly payment date, pro-rated based on the number of days of the period; and
- b) a quarterly release by the Bank to the Trust of the outstanding collateral amount calculated at an annual rate of 16.9% of the average outstanding amount over the period.

# Diversified Investment Grade Income Trust, Series 1

Notes to Financial Statements

December 31, 2006 and 2005

---

## Credit risk

As a result of entering into the credit default swap agreement, the Trust is exposed to levered credit exposure. Any credit event (bankruptcy, failure to pay or restructuring of a reference entity) relating to a reference entity would result in a net loss for the Trust. The first \$11,200,000 of net losses within the portfolio of reference entities is the maximum loss that can be assumed by the Trust.

In addition, the Trust is exposed to counterparty credit risk arising from any unrealized gain on the credit default swap plus any amount receivable from the Bank. As the maturity date of the Trust approaches, the amount of exposure to the counterparty risk will gradually grow to approximately \$9,500,000 plus any unrealized gain or minus any unrealized loss on the credit default swap. Management believes that the probability of default is low. The counterparty credit risk exposure on December 31, 2006 was \$7,541,287 (2005 – \$6,641,560).

During the year ended December 31, 2006, no credit event occurred in the portfolio of reference obligations.

On October 8, 2005, Delphi, a reference entity included in the portfolio, filed for bankruptcy protection for its U.S. operations. The Bank, as swap counterparty, sent the Trust a Credit Event Notice and a Notice of Publicly Available Information advising that a credit event had occurred with regard to this reference entity. The Bank proceeded with the valuation process on October 24, 2005 and the final price was 67.28%, resulting in a net loss amount of \$366,464 (\$0.31 per unit), thereby reducing the price at which all outstanding units will be redeemed at maturity on October 9, 2007 to \$10,782,206 (approximately \$8.99 per unit) from \$11,148,670 (approximately \$9.30 per unit). Following this credit event, the reference entity was removed from the portfolio which now includes 99 equally weighted reference entities.

During the year ended December 31, 2005, no other credit event occurred in the portfolio of reference obligations

## Interest rate risk

There is an interest rate risk associated with the derivative instrument, which has several components, one of which is to compensate for a risk assumed with time. Market rates can vary and cause fluctuations in the fair value of the derivative instrument having a fixed rate at the signing of the contract.

## 5 Credit default swap receivable

The credit default swap receivable consists of the unpaid amount to the Trust with regard to the income on the credit default swap, which is calculated at the annual rate of 16.9% and is reduced by the amount of interest paid on the credit default swap to the Bank at the Canadian banker's acceptance three-month rate.

The amount receivable, net of any excess net loss amounts incurred upon the occurrence of credit events over the short-term investments given as a collateral amount, will be received on October 9, 2007, the maturity date of the Trust.

# Diversified Investment Grade Income Trust, Series 1

Notes to Financial Statements

December 31, 2006 and 2005

---

## 6 Income taxes

The Trust qualifies as a unit trust within the meaning of the Income Tax Act (Canada). The Trust is subject to income taxes under this Act on the amount of taxable income for the year and can deduct in computing its income tax for all amounts paid or payable to the Trust's unitholders in determining its income for tax purposes.

Any amount payable under the credit default swap is considered to be an amount of income payable under the swap agreement and taxable as such. According to the terms of the swap agreement, the amount will be determinable only on the maturity date, and therefore the swap payment to the Trust should only be taxable as income at the maturity date.

## 7 Unitholders' capital

### Authorized units

The Trust is authorized to issue in series an unlimited number of transferable and redeemable units, each of which represents an equal undivided interest in the net assets of the Trust.

All units have equal rights and privileges. Each whole unit is entitled to one vote and to participate equally with respect to any and all distributions made by the Trust.

Units may be surrendered for redemption at any time but will be redeemed only on a quarterly basis on the last business day of each of the months of March, June, September and December (the "redemption date") for an amount equal to the redemption price of the units determined as of such redemption date.

The redemption price will be equal to the lesser of:

- a) 90% of the daily weighted average trading price per unit on the principal exchange on which the units are listed for the five trading days preceding the redemption date; and
- b) an amount equal to:
  - i) the closing price of the units on the principal exchange on which the units are listed; or
  - ii) the average of the highest and lowest prices of the units if the exchange or other market on which the units are listed provides only the highest and lowest trading prices; or
  - iii) the average of the latest bid and ask prices on the principal exchange on which the units are listed if there was no trading on such redemption date.

Notes to Financial Statements

December 31, 2006 and 2005

---

## Quarterly distributions

Distributions to unitholders constitute partial capital reimbursement at the issue price of the units and may fluctuate from quarter to quarter depending on the occurrence of credit events in the portfolio.

	2006	2005
	\$	\$
Unitholders' capital – Beginning of year	5,585,608	7,289,608
Distributions to unitholders	<u>(1,632,000)</u>	<u>(1,704,000)</u>
Unitholders' capital – End of year	<u>3,953,608</u>	<u>5,585,608</u>

## 8 Comparative figures

To conform to the presentation adopted in the current year, certain amounts from the prior year have been reclassified.
