

State-of-the-art Market Data

New location for the watchlists and Realtime Quote function

To simplify navigation, the watchlists and the Realtime Quote functions have been reworked to be more strategic within the site. As a result, the quotes and tools link that used to be found in the upper right-hand corner has been removed.

- 1 The watchlist function can now be found under the Tools tab. All of its uses have been brought together on the same page to make them more user friendly.
- 2 It is now faster to get quotes in real time! The Realtime Quote function has been embedded right into the pages available under Quotes & Markets. All you have to do is click on the Realtime Quote button to get the information.

The screenshot shows the 'Watchlist' page on the National Bank Financial website. The navigation menu at the top includes 'My Account', 'Portfolio', 'Markets', 'Research', and 'Analysis'. A blue box labeled '1' highlights the 'Tools' tab. The main content area displays a table of watchlist items with columns for 'Symbol', 'Bid', 'Bid Size', 'Ask', 'Ask Size', 'Last', 'Change', 'Volume', and 'Time'. A red 'NEW' banner is in the top right corner.

Symbol	Bid	Bid Size	Ask	Ask Size	Last	Change	Volume	Time
GOOD	565.27	100	565.44	200	565.29	+5.26	4,881,074	14:01
F	11.81	25,300	11.82	20,950	11.81	-0.26	101,111,398	14:01

State-of-the-art Market Data

A more intelligent, more accessible symbol lookup tool

- The symbol lookup tool now offers auto-suggestions, which can be very useful when you don't know the exact symbol of the security you're looking for.

The symbol lookup tool can now be found on every page of the Quotes & Markets section, including the Mutual Funds section.

Sector Performance

- This new chart shows you the performance of various sectors in percentage form. Understand market movements at a glance!

This information is available for the Toronto and New York stock exchanges.

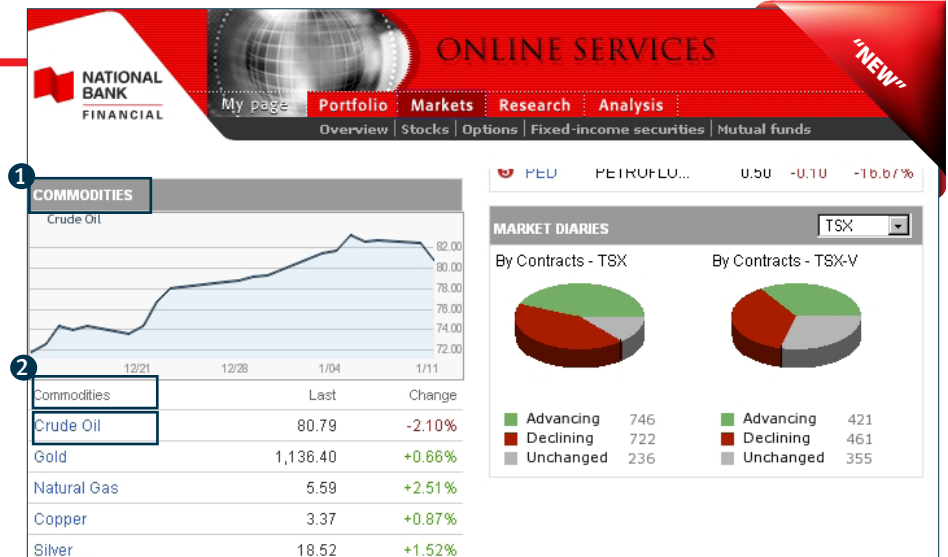

State-of-the-art Market Data

Chart and table for tracking commodities trends

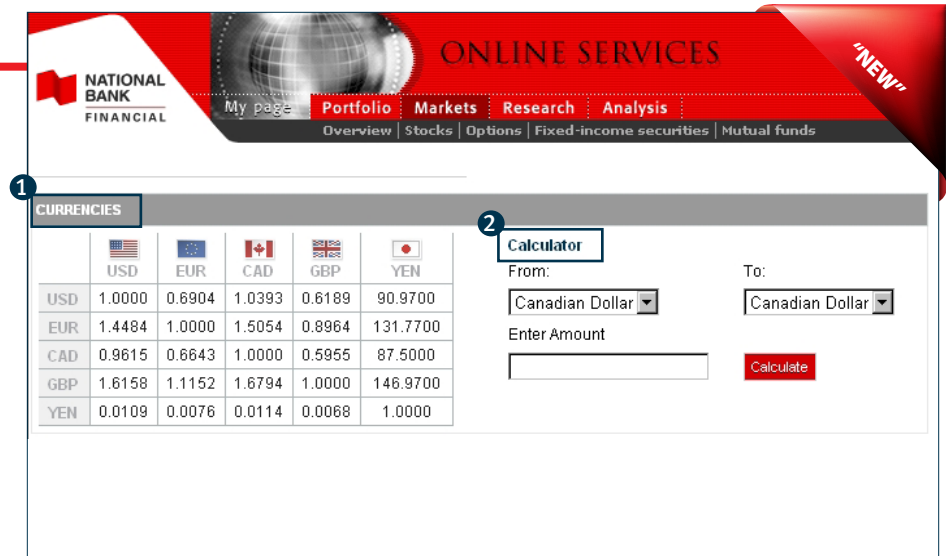

- 1 You can now track commodities trends using a table or chart.
- 2 Want to see commodities trends displayed graphically? Just click on its name in the table.

The chart shows changes in the price of a commodity for the last month, from the last closing price.

Currency table and conversion tool

- 1 This new function lets you follow changes in major currencies.
- 2 A conversion calculator is also available to complement the currency table.

State-of-the-art Market Data

Charts that are more sophisticated and perform substantially better

Thanks to cutting-edge technology, the charts are more visually appealing and easier to consult.

Options have been added so that you now have access to basic technical analysis functions in order to perform more comprehensive searches.

- 1 You can display splits, dividend payments and benchmark indices on the charts and even see comparisons with another security.
- 2 Move the mouse over the chart to find out the dividend amount paid and the payment date.

A more powerful news tool

- 1 The greatly improved news tool is more user-friendly and lets you perform more targeted searches. You can search by keyword, symbol, date range or type of news.
- 2 You can also search for news related specifically to gainers and losers by stock market.

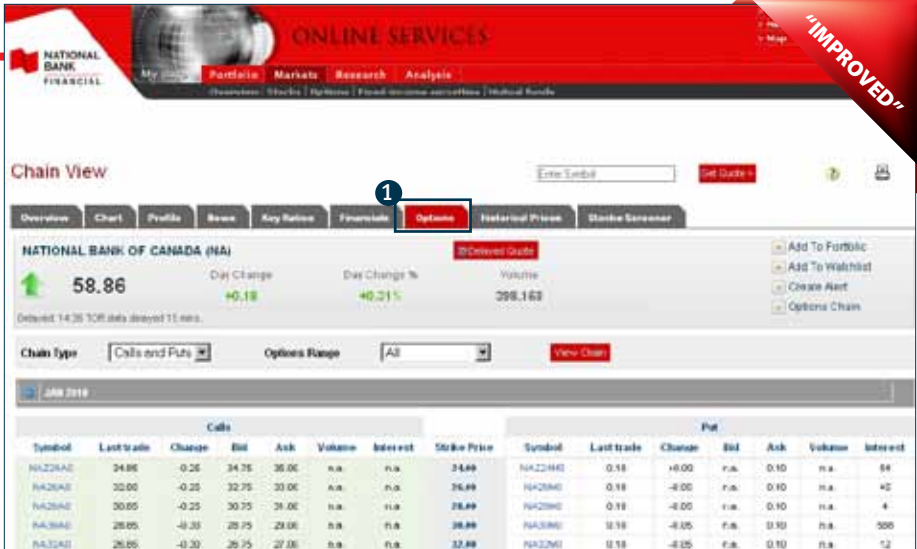

State-of-the-art Market Data

Faster option quotes

The response time for getting option quotes has been greatly improved.

- 1 An Options tab has been added to the Stocks section to give you faster access to the series of options for the security you are consulting. That means fewer clicks for you as you no longer have to go through the Options Center for this information.

A more ergonomic mutual funds section

The layout and ergonomics of the mutual funds section has been reworked. It is now easier to find your way around.

- 1 You now have access to a comparison tool that lets you compare up to three different mutual funds.
- 2 The symbol lookup tool now lets you enter the name of a mutual fund company.

A better stock screening tool

- 1 The performance of the tool to screen stocks has been greatly improved. As you add selection criteria to your search, the tool instantly displays the corresponding number of results.
- 2 You will also notice that the tool has a more user-friendly look.
