GLOBAL DIVERSIFIED INVESTMENT GRADE INCOME TRUST

MANAGEMENT REPORT OF FUND PERFORMANCE

December 31, 2006

This annual management report of fund performance contains financial highlights but does not contain the complete financial statements of the investment fund. You can get a copy of the annual financial statements by visiting the website of National Bank Financial Inc. at www.nbfinancial.com or SEDAR at www.sedar.com or, at your request, and at no cost, by calling toll-free 1-877-879-6424, or by writing to us at 800 Victoria Square, Suite 3400, Montréal, Québec H4Z 1E9.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's portfolio disclosure.

Management Report of Fund Performance

This annual management report of fund performance contains financial highlights but does not contain the complete audited annual financial statements of the investment fund.

Metcalfe & Mansfield Alternative Investments Corp. and 4227298 Canada Inc are the co-trustees of the issuer, Global Diversified Investment Grade Income Trust (“**Global Digit**”). Metcalfe & Mansfield Alternative Investments Corp. is the trustee for MMAI-I Trust (“**MMAI-I**”), a trust consolidated with Global Digit. Global Digit and MMAI-I are collectively referred to as the “**Trust**” in this report and in the audited annual financial statements. Metcalfe & Mansfield Alternative Investments Corp. and 4227298 Canada Inc are affiliates and are collectively referred to as the Trustee in this report.

1. Investment Objectives and Strategy

Global Digit’s principal objectives are:

- (i) to provide holders of units (the “**Unitholders**”) with a fixed rate stream of monthly distributions equal to \$0.0495 per unit (\$0.594 per annum) (5.94% per annum compounded monthly or an effective annual rate of 6.10% on the original issue price of \$10.00) up to on or about September 7, 2009 and, thereafter, a floating distribution rate equal to the rate of bankers acceptances plus 2%. The distributions will consist of capital reimbursements, which will reduce the adjusted cost base thereof until the adjusted cost base of the units is reduced to zero and thereafter, of income payments; and
- (ii) to repay to Unitholders on or about September 7, 2014 (the “**Expected Maturity Date**”), but no later than on or about September 7, 2016 (the “**Legal Maturity Date**”), an amount equal to the original subscription price of \$10.00 per unit.

To meet its objectives, Global Digit entered into three credit default swap agreements providing an economic interest in exposures rated A-/A by Standard&Poor’s Rating Services, a division of The McGraw-Hill Companies, Inc. (“**S&P**”) with MMAI-I, which itself entered into six credit default swap agreements (the “**Financial Contract**”) with one of the ten largest global financial institutions (the “**Bank**”) by assets, having a rating for its long-term debt obligations as of December 31, 2006 of AA- by S&P and Aa3 by Moody’s Investors Services, Inc. (“**Moody**”). These credit default swaps provide Unitholders with an exposure to six global diversified portfolios (individually, the “**Credit Exposure A, B, C, D, E or F**” and collectively, the “**Credit Exposures**”) of mortgage-backed securities, asset-backed securities, structured finance securities, synthetic corporate exposures and other fixed-income securities (collectively the “**reference obligations**”). Credit Exposures A, B and C (the “**Senior Exposure**”) contain the same reference obligations as Credit Exposures D, E and F (the “**Mezzanine Exposure**”) respectively. The Senior Exposure has been rated AAA by S&P and Dominion Rating Services Ltd. (“**DBRS**”) while the Credit Exposures D, E and F of the Mezzanine Exposure have been rated A-, A and A respectively by S&P. The Trust’s obligations under the credit default swaps are collateralized by term deposit investments made by the Trust. The term deposit investments have been funded by the proceeds from the initial public offering of Global Digit as well as by the issuance of commercial paper and floating rate notes by MMAI-I.

2. Risks

The Unitholders will benefit from a protection in the form of a first loss amount for the Mezzanine Exposure. To the extent that any losses, net of any recoveries, are incurred as a result of credit events in the portfolio in excess of the first loss amount, the notional amount of the Mezzanine Exposure, and therefore the amount that will be repaid to Unitholders by the Trust on the Expected Maturity Date (or Legal Maturity Date, as the case may be) would decline (eventually up to zero), as would monthly distributions on the units.

A credit event is, for a given credit exposure, the occurrence of one of the following events in respect of a reference obligation in the portfolio: bankruptcy, failure to pay and any other loss event in respect of such reference obligation.

Risks and uncertainties associated with investing in Global Digit units remains as described in Schedule A.

3. Results of Operations

The assets of the Trust are primarily an investment in term deposits and credit default swap agreements in relation to three portfolios of Credit Exposures containing, as at December 31, 2006, respectively 76, 91 and 80 securities. The aggregate notional amount of the Credit Exposures is \$34,112,552,500. The aggregate amount of term deposit investments and interest-bearing receivable assets under the credit default swaps is \$1,478,219,542.

A comprehensive description of the assets and liabilities of the Trust may be found in the prospectus which can be found on SEDAR at www.sedar.com. The following description is intended to provide a plain language summary of its assets and liabilities.

Term Deposit Investments

The term deposit investments of the Trust which consists of a Bayerische Landersbank Floating Rate Note and a National Bank of Canada Term Deposit Note have been pledged as collateral under the Financial Contract.

Management of the Portfolio

The Bank makes all decisions concerning the composition of the portfolio of reference obligations and the addition and removal of reference obligations to or from the portfolio, subject to certain investment restrictions. Any changes to the composition of the portfolio by the Bank are made solely in the interest of the parties exposed to the risk of the first loss amount on the Credit Exposures. Irrespective of the amount of losses sustained in respect of the Credit Exposures, at no time will the Bank have any obligation to act in, or take account of, the interests of the Trust or the Unitholders. The Bank will have sole discretion to modify the composition of the portfolio within applicable investment restrictions, which may have a positive or negative impact on the credit performance of the Credit Exposures.

Once acquired, the Credit Exposures are not expected to be replaced, sold or terminated until the Expected Maturity Date (or the Legal Maturity Date, as applicable). The Trustee has no obligation to replace, modify, sell or terminate the Credit Exposures. Subject to the consent of the Bank, the Trustee may request an amendment to certain Credit Exposures (exclusively as to synthetic corporate exposures) if, in its judgement, such amendment is advisable. Such amendment may result in a reduction of the first loss amount. Any amendment to the Credit Exposures held by the Trust are not subject to the approval of the Unitholders and are at the sole discretion of the Trustee.

Credit Quality of the Portfolios and Credit Exposures

Credit Exposures A and D

As of December 31, 2006, Credit Exposures A and D are respectively the Senior Exposure and the Mezzanine Exposure to a portfolio containing 76 reference obligations, including 71 mortgage-backed securities, asset-backed securities and other fixed-income securities and 5 synthetic corporate exposures.

The S&P ratings of the mortgage-backed securities, asset-backed securities and other fixed-income securities exposures in Credit Exposures A and D were distributed as follows at inception (by notched S&P rating category), on December 31, 2005 and December 31, 2006 (by equivalent S&P rating category):

Rating	Inception	December 31, 2005	December 31, 2006
AAA	59.8%	68.3%	79.4%
AA	21.6%	15.0%	8.1%
A	18.6%	16.7%	12.5%

The Moody's ratings of the mortgage-backed securities, asset-backed securities and other fixed-income securities exposures in Credit Exposures A and D were distributed as follows at inception, (by notched Moody's rating category) on December 31, 2005 and on December 31, 2006 (by equivalent Moody's rating category):

Rating	Inception	December 31, 2005	December 31, 2006
Aaa	55.5%	68.4%	80.1%
Aa	21.6%	9.1%	0.6%
A	22.9%	22.6%	19.3%

The most recently communicated DBRS ratings of the synthetic corporate exposures in Credit Exposures A and D were distributed as follows at inception, on December 31, 2005 and on December 31, 2006:

Rating	Inception	December 31, 2005	December 31, 2006
AAA	40.0%	40.0%	40.0%
AA	40.0%	40.0%	40.0%
A	20.0%	20.0%	20.0%

The weighted average assigned Moody's rating factor of the mortgage-backed securities, asset-backed securities, other fixed-income securities and synthetic corporate exposures in Credit Exposures A and D was 33 initially (between Aa2 and Aa3 equivalent), 29 as of December 31, 2005 (between Aa2 and Aa3) and 24 as at December 31, 2006 (between Aa2 and Aa3). The weighted average assigned Moody's rating factor is calculated by (i) adding the product of the notional amount of each reference obligation and its assigned Moody's rating factor and (ii) dividing such amount determined under (i) by the notional amount and converting the result to its equivalent Moody's rating factor determined as follows: a Moody's rating of Aaa, Aa1, Aa2, Aa3, A1, A2 or A3 is assigned a rating factor of respectively 1, 10, 20, 40, 70, 120 or 180. The reference obligations exposures in Credit Exposures A and D had a weighted average default probability equivalent to a rating between AA and AA- by S&P initially and as of December 31, 2005, and between AA+ and AA as of December 31, 2006.

Credit Exposures A and D composition by asset classes at inception, December 31, 2005 and December 31, 2006 were as follows:

Asset Class	Inception	December 31, 2005	December 31, 2006
Commercial asset-backed securities	7.6%	7.6%	14.5%
Consumer asset-backed securities	4.0%	1.5%	4.0%
Residential mortgage-backed securities	41.9%	45.5%	39.4%
Commercial mortgage-backed securities	21.5%	17.7%	11.9%
Structured exposures to mortgage-backed, asset-backed and corporate securities	0.0%	2.8%	5.2%
Synthetic corporate exposures	25.0%	25.0%	25.0%

Credit Exposures B and E

As of December 31, 2006, Credit Exposures B and E are respectively the Senior Exposure and the Mezzanine Exposure to a portfolio containing 91 reference obligations, including 86 mortgage-backed securities, asset-backed securities and other fixed-income securities and 5 synthetic corporate exposures.

The S&P ratings of the mortgage-backed securities, asset-backed securities and other fixed-income securities exposures in Credit Exposures B and E were distributed as follows at inception (by notched S&P rating category), on December 31, 2005 and on December 31, 2006 (by equivalent S&P rating category):

Rating	Inception	December 31, 2005	December 31, 2006
AAA	49.8%	57.6%	67.7%
AA	31.8%	22.5%	16.3%
A	18.4%	19.9%	16.0%

The Moody's ratings of the mortgage-backed securities, asset-backed securities and other fixed-income securities exposures in Credit Exposures B and E were distributed as follows at inception, (by notched Moody's rating category) on December 31, 2005 and on December 31, 2006 (by equivalent Moody's rating category):

Rating	Inception	December 31, 2005	December 31, 2006
Aaa	49.0%	53.9%	68.7%
Aa	29.1%	23.4%	12.7%
A	21.9%	22.7%	18.6%

The most recently communicated DBRS ratings of the synthetic corporate exposures in Credit Exposures B and E were distributed as follows at inception, December 31, 2005 and December 31, 2006:

Rating	Inception	December 31, 2005	December 31, 2006
AAA	40.0%	40.0%	40.0%
AA	40.0%	40.0%	40.0%
A	20.0%	20.0%	20.0%

The weighted average assigned Moody's rating factor of the mortgage-backed securities, asset-backed securities, other fixed-income securities and synthetic corporate exposures in Credit Exposures B and E was 36 initially (between Aa2 and Aa3 equivalent), 39 as of December 31, 2005 (between Aa2 and Aa3) and 29 as of December 31, 2006 (between Aa2 and Aa3). The reference obligations exposures in Credit Exposures B and E had a weighted average default probability equivalent to a rating between AA and AA- by S&P at inception, as of December 31, 2005 and as of December 31, 2006.

Credit Exposures B and E composition by asset classes at inception, December 31, 2005 and December 31, 2006 were as follows:

Asset Class	Inception	December 31, 2005	December 31, 2006
Commercial asset-backed securities	2.6%	4.2%	5.7%
Consumer asset-backed securities	11.2%	6.1%	7.2%
Residential mortgage-backed securities	48.2%	49.3%	33.8%
Commercial mortgage-backed securities	13.0%	15.5%	26.8%
Structured Exposure to mortgage backed, asset-backed and corporate Securities	0.0%	0.0%	1.5%
Synthetic corporate exposure	25.0%	25.0%	25%

Credit Exposures C and F

As of December 31, 2006, Credit Exposures C and F are respectively the Senior Exposure and the Mezzanine Exposure to a portfolio containing 80 reference obligations, including 75 mortgage-backed securities, asset-backed securities and other fixed-income securities and 5 synthetic corporate exposures.

The S&P ratings of the mortgage-backed securities, asset-backed securities and other fixed-income securities exposures in Credit Exposures C and F were distributed as follows at inception (by notched S&P rating category), on December 31, 2005 and on December 31, 2006 (by equivalent S&P rating category):

Rating	Inception	December 31, 2005	December 31, 2006
AAA	68.8%	77.7%	60.4%
AA	23.4%	15.8%	30.3%
A	7.8%	6.5%	9.3%

The Moody's ratings of the mortgage-backed securities, asset-backed securities and other fixed-income securities exposures in Credit Exposures C and F were distributed as follows at inception, (by notched Moody's rating category) on December 31, 2005 and on on December 31, 2006 (by equivalent Moody's rating category):

Rating	Inception	December 31, 2005	December 31, 2006
Aaa	68.8%	75.9%	61.9%
Aa	22.9%	17.5%	25.3%
A	9.0%	6.6%	12.8%

The most recently communicated DBRS ratings of the synthetic corporate exposures in Credit Exposures C and F were distributed as follows at inception, as of December 31, 2005 and as of December 31, 2006:

Rating	Inception	December 31, 2005	December 31, 2006
AAA	40.0%	40.0%	40.0%
AA	40.0%	40.0%	40.0%
A	20.0%	20.0%	20.0%

The weighted average assigned Moody's rating factor of the mortgage-backed securities, asset-backed securities, other fixed-income securities and synthetic corporate exposures in Credit Exposures C and F was 19 initially, 16 as of December 31, 2005 (between Aa1 and Aa2 equivalent) and 25 as of December 31, 2006 (between Aa2 and Aa3 equivalent). The reference obligations exposures in Credit Exposures C and F had a weighted average default probability equivalent to a rating between AA+ and AA by S&P initially and as of December 31, 2005, and between AA and AA- as of December 31, 2006.

Credit Exposures C and F composition by asset classes at inception, December 31, 2005 and December 31, 2006 were as follows:

Asset Class	Inception	December 31, 2005	December 31, 2006
Commercial asset-backed securities	0.0%	0.0%	0.0%
Consumer asset-backed securities	4.5%	5.3%	4.5%
Residential mortgage-backed securities	49.0%	53.4%	51.6%
Commercial mortgage-backed securities	21.6%	15.9%	13.2%
Structured exposures to mortgage-backed, asset-backed and corporate securities	0.0%	0.3%	5.7%
Synthetic corporate exposures	25.0%	25.0%	25.0%

Net Asset Value

The net asset value (“NAV”) of the Trust was \$9.42 as at December 31, 2006 as compared with \$9.36 as at December 31, 2005. The NAV reflects a complete write-off, at inception, of the \$6,932,672 (\$0.65 per unit) issue expense incurred with the initial public offering of Global Digit. The NAV also reflects differences between the accounting value of the swaps and their par value.

Determination of the Net Asset Value of the Units

The NAV is calculated by National Bank of Canada, as administrative agent (the “**Administrative Agent**”) as of the last business day of each month and approved by the Trustee before its publication.

The NAV on a particular date is equal to the aggregate value of the assets of the Trust, less the aggregate value of its liabilities (including any operating expenses payable) and the underlying income taxes on income earned. The “NAV per unit” on any day is obtained by dividing the NAV of the Trust on that day by the number of units outstanding on the same day. The NAV is posted on the Web site of National Bank Financial Inc. at www.nbfinancial.com and on SEDAR at www.sedar.com and is published monthly by Global Digit.

In calculating the NAV, the Administrative Agent uses the following rules:

- (i) the value of the Financial Contract is established by reference to the credit performance of the Credit Exposure and the reference obligations, general market conditions and all other relevant criteria including a bid and ask indication provided monthly by the Bank for the Financial Contract. The bid and ask indication provided by the Bank reflects the price that it would be ready to purchase or sell a \$1 million tranche of the Financial Contract. This indication may reflect factors such as the market’s assessment of overall credit quality of the portfolio as measured by the trading price of the debt (and derivatives thereof) of reference obligations, interest rates as well as factors that are proprietary to the Bank, such as correlation between individual reference obligations and other securities in the portfolio of the Bank.
- (ii) in accordance with Generally Accepted Accounting Principles (“GAAP”), money market instruments and bank deposits are valued at cost plus accrued interest at the time of calculation;
- (iii) the value of any permitted investments is established by reference to prevailing interest rates, general market conditions and all other relevant criteria;

- (iv) the value of any other bonds, debentures and other debt obligations is established by reference to prevailing interest rates, general market conditions and all other relevant criteria; and
- (v) the value of any cash on hand or on deposit, prepaid expenses and interest accrued and not yet received, is deemed to be the face amount thereof unless it is determined by the Administrative Agent that any such asset is not worth the face amount thereof, in which event the value is determined by Administrative Agent.

If any of these rules cannot be used or are at any time considered inappropriate under the circumstances, then such valuation is established with such other rules in conformity with GAAP in a fair and reasonable manner. As of December 31, 2006, no asset had been valued otherwise than in accordance with the above rule.

The process of valuing investments for which no published market exists is based on inherent uncertainties and the resulting values may differ from values that would have been used had a ready market existed for the investments and may differ from the prices at which the investments may be sold.

Income and Distributions

During the year ended December 31, 2006, the Trust had a net income of \$6,557,137 (\$0.67 per unit) (respectively \$5,660,614 and \$0.53 per unit in 2005) and has declared distributions of \$6,169,681 (\$0.594 per unit) (respectively \$6,363,225 and \$0.594 per unit in 2005) to its Unitholders. In 2006, the net income was reduced by an unmaterialized loss of \$366,740 (\$0.04 per unit) (depreciation of \$1,900,000 in 2005 or \$0.18 per unit) in the accounting value of the Financial Contract net of a \$61,907 (\$35,284 in 2005) unmaterialized appreciations in interest rate swaps contracted in 2006. Excluding this unmaterialized reductions with the accounting value of the Financial Contract, the Trust has thus been accumulating gains so as to recover its issue cost and be able to further its objective of redemption of the units at the \$10.00 issue price at Expected Maturing Date (on legal Maturity Date, as applicable)

The distributions made by the Trust were entirely made of return of capital and have resulted in a reduction in the amount of the term deposits held by the Trust. The amount of term deposits held by the Trust decreased by \$7,767,699 as a result of the sale of \$8,884,000 of investments for the redemption of 950,746 units made by the Trust in September 2006 and by \$6,217,273 (\$6,363,225 – 2005) as a result of liquidations in the term deposits to finance the distributions. Hence, the reduction of \$6,217,273 in the term deposits was compensated by the accrual of an interest-bearing credit swap receivable of \$6,217,273 reported as part of the \$14,571,938 shown on the balance sheet as of December 31, 2006 (\$9,571,237 – 2005).

Borrowings and Interest Rate Hedging

On December 31, 2006, the Trust had \$1,399,654,813 (as compared to \$1,401,574,172 on December 31, 2005) in outstanding commercial paper and floating rate notes. The mix of commercial paper and floating rate notes may vary over a given period, but the aggregate amount has not, and is not expected to vary materially.

The commercial paper is rated R-1 (high) and the floating rate notes are rated AAA by DBRS.

MMAI-I also has a short term liquidity arrangement whereby the Bank has agreed that, in market disruption circumstances, it will purchase senior debt from MMAI-I if MMAI-I is unable to sell such debt to third parties. The purchase price of such debt will be used to fund repayment of MMAI-I's then maturing debt.

From time to time, MMAI-I enters into interest swap arrangements to hedge interest payable under the floating rate notes and the commercial paper to maturities matching the interest that MMAI-I earns pursuant to the credit

default swaps. For accounting purposes, these arrangements are not documented to qualify for hedging accounting.

In connection with the Financial Services Agreement (see “Transactions with the Promoter and its Affiliates”), at closing of the initial public offering of the Trust, a placement and structuring fee (the “**PSF Fee**”) was earned by, and is payable to the Financial Services Agent. A portion of this PSF Fee was securitized on September 29, 2004 through the issue of a \$16,442,460 note which amount was received by the Financial Services Agent. This note is shown as the Placement and Structuring Fee Note (the “**PSF Note**”) on the Trust’s consolidated balance sheet with an unpaid balance of \$11,898,126 as at December 31, 2006. The PSF Note is shown as prepaid expenses on the Trust’ consolidated balance sheet with an unamortized balance of \$11,309,939 as at December 31, 2006. As the amortization methods of the PSF Note and the prepaid expenses are not the same, the accreted value of the Trust, as defined below, reflects the difference in amortization.

Hedging Through the Credit Default Swap Agreements with Global Private Trust

The Trust has entered into back-to-back swap agreements in respect of Credit Exposures D, E and F with the Global Diversified Investment Grade Private Trust (“**Global Private Trust**”) pursuant to which Global Private Trust will pay the Trust if credit events occur in connection with the reference obligations until the Expected Maturity Date at the earliest or the Legal Maturity Date at the latest. The agreements are hedging \$40,000,000 of the \$131,116,000 (\$140,000,000 – 2005) exposure of the Trust to the Mezzanine Exposure.

The amounts exchanged under the swap agreements with Global Private Trust are as follows:

- a) A monthly payment made by Global Private Trust to the Trust, based on an amount corresponding to the contractual interest rate applied to the nominal value of the investment in term deposits pledged as security by Global Private Trust and to a contractual rate applied to the swap notional amount between Global Private Trust and the Trust.
- b) On a monthly basis, the Trust will acquire from Global Private Trust, for resale to the Bank, a portion contractually determined of the term deposit investment pledged as security by Private Trust to the Trust under the swap agreements; this portion is equal to the monthly release for the month in consideration. This monthly release by the Trust to Private Trust will be of an amount sufficient to provide a distribution calculated at an annual rate of 6.81% on the notional amount as at December 31, 2006 and 2005 of \$40,000,000 (less any net losses from credit events on the reference obligations underlying the credit default swaps) until September 2009; thereafter, the expected distribution will be equal to the bankers’ acceptance rate plus a margin, payable monthly.

In connection with the swap, Global Private Trust has posted as collateral a term deposit in the amount of \$40,000,000 which has been used by the Trust to satisfy part of its own obligation to post collateral in connection with the Mezzanine Exposure.

4227301 Canada Inc., an affiliate of the Trustee, acts as trustee of the Global Private Trust. 4227301 Canada Inc. does not receive any compensation for its role as trustee for the Global Private Trust. The Administrative Agent acts in a similar capacity for the Global Private Trust. The interests of the Global Private Trust are unlikely to be in conflict with the interests of the Trust as both share the same exposure to the Mezzanine Exposure.

4. Recent Developments

Portfolio Changes

During the year ended December 31, 2006, the Trustee has not requested any change in the portfolio of securities included in the credit exposures and there were no credit event related to the reference obligations.

In the year ended on December 31, 2006, despite several downgrades, no reference obligation comprised in the portfolio has been subject to a credit event.

Redemptions

Pursuant to the quarterly Redemption of February 28, 2006, 10,700 units were submitted for redemption and were repurchased by the Trust. Moreover, pursuant to the annual Redemption of August 31, 2006, 950,746 units were submitted for redemption and the trustees of the Trust have elected to redeem the units so tendered at the unwind price of \$8.824 per unit. Following the February repurchase and the August unwind, the outstanding number of units was 9,751,054 as of December 31, 2006 (original number of units, minus repurchase and unwind = $10,712,500 - 10,700 - 950,746 = 9,751,054$).

5. Transactions with the Promoter and its Affiliates

Administrative Agent Agreements

Pursuant to the Administrative Agent Agreement, the Trustee has delegated its administrative duties relating to Global Digit to Natcan Trust Company ("**Natcan Trust**"). Under this agreement, Natcan Trust is responsible for providing administrative services to Global Digit including, without limitation:

- (i) making the payment of operating expenses incurred on behalf of Global Digit;
- (ii) preparing financial statements, financial and accounting information as required by Global Digit;
- (iii) making distributions to Unitholders and or other relevant parties or entities;
- (iv) ensuring that Unitholders and other relevant parties or entities are provided with financial statements (including annual and quarterly financial statements) and other reports as are from time to time required by applicable laws;
- (v) ensuring that Global Digit complies with regulatory requirements and applicable stock exchange listing requirements;
- (vi) preparing Global Digit's reports to Unitholders and to the Canadian securities regulatory authorities; and
- (vii) providing the Trustee with information and reports necessary for it to fulfil its fiduciary responsibilities.

In 2006, the administrative agent, Natcan Trust, transferred its appointment as administrative agent to National Bank of Canada ("**NBC**") effective as at October 16th, 2006. In 2006, fees and reimbursement of expenses incurred in relation with this function totalled \$60,634 (\$71,591 in 2005).

Pursuant to an administrative agent agreement, Metcalfe & Mansfield Alternative Investments Corp., as trustee for MMAI-I has delegated its administration duties relating to MMAI-I, the entity consolidated with Global Digit, to National Bank Financial Inc. (“NBF”), an affiliate of Natcan Trust. Under this agreement, NBF is responsible for providing administrative services to MMAI-I including, without limitation:

- (i) making the payment of operating expenses incurred on behalf of MMAI-I;
- (ii) maintaining proper books of account and complete record of transactions as required by MMAI-I;
- (iii) making distributions and payments to any relevant parties or entities;
- (iv) ensuring that relevant parties or entities are provided with financial statements and other reports as are from time to time required by applicable laws; and
- (v) providing the Trustee with information and reports necessary for it to fulfil its fiduciary responsibilities and negotiating contractual agreements with third party providers of services.

In 2006, NBF earned fees of \$8,000 for these services (\$8,000 in 2005).

Financial Services Agreement

Pursuant to a Financial Services Agreement, the Trustee has delegated financial services responsibilities relative to MMAI-I to NBF. Under this agreement, NBF assumes on behalf of MMAI-I the activities relating to the origination or acquisition of asset interests, negotiation, settlement and completion of related transaction including credit default transactions, issuance, sale and payments of notes and the performance by MMAI-I of all obligations under the Trust Indenture, any liquidity agreements and agency agreements.

In 2006, NBF is entitled to a fee of \$4,477,224 for these services (\$3,833,299 in 2005).

Agency Agreements

Pursuant to an agency agreement, the Trust has retained the services of NBF as one of several of its agents to arrange for the offering and distribution of senior debt. In 2006, NBF earned fees of \$615,342 (\$572,704 in 2005).

Recirculation Agreement

Pursuant to a Recirculation Agreement, the Trust retained the services of NBF to use commercially reasonable efforts to find purchasers for any units tendered for redemption. Global Digit may, but is not obligated to, require NBF to seek such purchasers.

No fees are payable to NBF in connection with this agreement.

Custodial Agreement

Pursuant to a custodial agreement between the Trust and Natcan Trust, Natcan Trust acts as custodian of the Trust in respect of the assets of the Trust, except for the permitted investments which are held by the Bank as collateral to the Financial Contract.

In 2006, Natcan Trust earned fees of \$98,476 (\$123,745 in 2005) in connection with this agreement.

Registrar and Transfer Agent Agreement

Pursuant to a registrar and transfer agent agreement between the Trust and Natcan Trust Company, Natcan Trust Company, at its principal offices in Montreal and Toronto, was originally appointed registrar and transfer agent for the units. On April 28, 2006, another entity, Computershare Trust Company of Canada, was appointed registrar and transfer agent for the Units.

In 2006, as registrar and transfer agent, Natcan Trust earned fees of \$4,023 and Computershare Trust Company of Canada, \$3,975, for a total of \$7,998.

6. Reports by the Independent Review Committee

The Trustee is not entitled to receive any fee of any nature from the Trust. Since the Trustee is not entitled to receive any remuneration for its services, the interests of the Trustee and its independent directors are considered perfectly aligned on those of the Unitholders. The Board of Directors of the Trustee has appointed its three independent directors as members of its Governance Committee. The Governance Committee performs the role of the Independent Review Committee required under the proposed NI-81-107 rule.

The Governance Committee of the Board of Directors of the Trustee made no report during the interim period ended December 31, 2006.

7. Financial Highlights

The following tables show selected key financial information about the Trust and are intended to help explain the Trust's financial performance since inception. This information is derived from the Trust's audited annual financial statements:

Net Asset Value per unit:	December 31, 2006	December 31, 2005	December 31, 2004	September 9, 2004 ⁽¹⁾
Weighted average number of outstanding units	10,386,668	10,712,500	10,712,500	10,712,500
Net Asset Value, beginning of period	\$9.36	\$9.43	\$9.35	\$10.00
Increase (decrease) from operations:				
Total revenues	\$8.53	\$6.51	\$1.93	-
Total expenses	(\$7.86)	(\$5.81)	(\$1.75)	-
Realized gains (losses) for the period	-	-	-	-
Unrealized gains (losses) for the period	(\$0.04)	(\$0.18)	\$0.08	-
Total increase (decrease) from operations	\$0.63	\$0.52	\$0.26	-
Issue expenses ⁽²⁾	-	-	-	(\$0.65)
Distributions⁽³⁾:				
From income (excluding dividends)	-	-	-	-
From dividends	-	-	-	-
From capital gains	-	-	-	-
Return of capital	(\$0.59)	(\$0.59)	(\$0.18)	-
Total Annual Distributions⁽⁴⁾	(\$0.59)	(\$0.59)	(\$0.18)	-
Net Asset Value, end of period	\$9.42	\$9.36	\$9.43	\$9.35

(1) At inception.

(2) Issue expense of \$6,932,672 incurred in connection with the initial public offering, principally consisting of agents' fees and other offering expenses, which has been charged to retained earnings prior to calculating the opening net asset value of \$9.35.

(3) Distributions are shown for the amount declared.

(4) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase / decrease from operations is based on the weighted average number of units outstanding over the financial period.

Ratio and Supplemental Data	December 31, 2006	December 31, 2005	December 31, 2004	September 9, 2004 ⁽¹⁾
Net Asset	\$91,867,318	\$100,310,741	\$101,013,352	\$100,192,328
Number of units outstanding	9,751,054	10,712,500	10,712,500	10,712,500
Net Asset Value per Unit	\$9.42	\$9.36	\$9.43	\$9.35
Portfolio turnover rate	-	-	-	-
Trading expenses ratio	-	-	-	-
Closing market price (TSX)	\$8.84	\$8.85	\$10.85	\$10.00

(1) At inception.

Accreted Value

At the Expected Maturity Date (or Legal Maturity Date, as applicable), there will be no unrealized gain or loss on the Trust investments. In the interim, the unrealized gain or loss reflects variations in the value of the Financial Contract as calculated from time to time. If the "accreted value" of the units is defined as their NAV restated to exclude any unrealized gain or loss on the Financial Contract and any timing difference between the amortization of the PSF Note and the prepaid expenses, the accrued value is a good indication of the amount in the Trust assets at a given date which would eventually be contributed towards the redemption of the units,

assuming no credit event between the calculation date and the Maturity. Another way to look at the accreted value is to view it as the net asset of the Trust valued at cost less impairments.

Accreted Value:	December 31, 2006	December 31, 2005	December 31, 2004	September 9, 2004 ⁽¹⁾
Weighted average number of units				
Outstanding	10,386,668	10,712,500	10,712,500	10,712,500
Accreted value at beginning	\$9.51	\$9.35	\$9.35	\$10.00
Decrease (decrease) from operations:				
Total revenues.....	\$8.53	\$6.52	\$1.93	-
Total expenses.....	(\$7.86)	(\$5.81)	(\$1.76)	-
Realized gains (losses) for the period.....	-	-	-	-
Issue expense	-	-	-	(\$0.65)
Plus: Amortization of prepaid PSF expenses.....	\$0.21	\$0.28	-	-
Minus: Reduction in the outstanding amount of the PSF Note.....	(\$0.21)	(\$0.22)	-	-
Distributions	(\$0.59)	(\$0.59)	(\$0.18)	-
Accreted Value at end	\$9.62	\$9.51	\$9.35	\$9.35
 Reconciliation of the Accreted Value and the Net Asset Value:				
Accreted value at end of period.....	\$9.62	\$9.51	\$9.35	\$9.35
Unrealized gains and losses since inception.....	(\$0.14)	(\$0.09)	0.08	-
Amount of prepaid expenses in excess of the PSF Note.....	(\$0.06)	(\$0.06)	-	-
Net Asset Value, end of period	\$9.42	\$9.36	\$9.43	\$9.35

(1) At inception.

The \$9.62 accreted value, as at December 31, 2006 reflects the fact that the Trust has paid less in distributions than its “cash” income and, hence, has been retaining a portion of its net income for the purpose of recovering the \$0.65 per unit issue expense incurred in connection with its initial public offering closed on September 9, 2004.

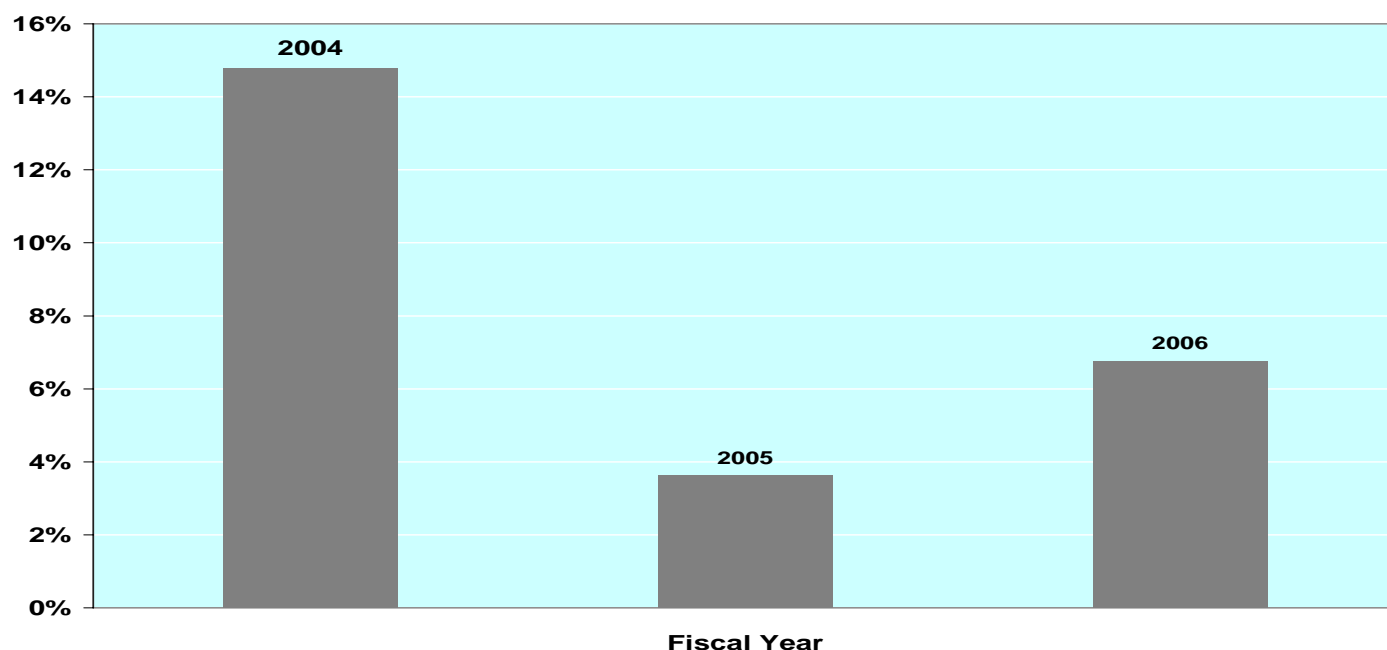

8. Past Performance

The following bar chart and table indicate the performance of the units by showing for the period the return by fiscal year and compound returns from inception assuming all the distributions made by Global Digit in the periods shown were reinvested at the NAV. Past performance is not necessarily indicative of future performance.

Return for the year

The following bar chart shows Global Digit’s annual performance for the period shown. This bar chart shows, in percentage terms, how much an investment made on the first day of the year 2006 would have grown or decrease by the last day of the year.

The Trust's objective (save for any loss exceeding the first loss amount) is to provide a return on investment of 5.94% per annum to Unitholders up to September 7, 2009 and thereafter a floating distribution equal to the rate of bankers acceptance plus 2%.

Annual Compound Returns

	Past Year	Since Inception
Based on NAV ⁽¹⁾	6.8%	6.5%
Based on unit price ⁽²⁾	6.9%	0.9%

(1) Calculated from initial net asset value of \$9.35 and December 31, 2006 net asset value of \$9.42 assuming all distributions reinvested.

(2) Calculated from issue price of \$10.00 and December 31, 2006 market price of \$8.84 assuming all distributions reinvested

9. Summary of the Investment Portfolio

- 1) Swap agreements A, B, C, D, E and F for a total notional value of \$1,491,116,000;
- 2) Swap agreement with Global Private Trust for a total notional value of \$40,000,000;
- 3) Bayerische Landersbank rated AAA Floating Rate Note for a total of \$1,400,000,000;
- 4) National Bank of Canada rated A Term Deposit Note for a total of \$78,219,542;
- 5) An interest-bearing receivable of \$14,571,938 under the swap agreements D, E and F.

Underlying Exposures

See Schedule B for a detailed description of the underlying Credit Exposures.

SCHEDULE A RISKS AND UNCERTAINTIES

The Trust is subject to various risks and uncertainties. The Trust's investment objectives could thus be adversely affected by each of the factors described below. Those are not the only ones faced by the Trust. Additional risks and uncertainties currently unknown to management of the Trustee or deemed rather unimportant could potentially have an impact on its business.

Credit Risk

As a result of entering into the Financial Contract, the Trust is exposed to a levered credit exposure. Any Credit Event triggered by a Reference Obligation in excess of the First Loss Amount would result in a net loss for the Trust.

Creditworthiness of MMAI-I and the Bank

Because the capacity of the Trust to redeem Units on the Expected Maturity Date (or the Legal Maturity Date, as applicable) or to make distributions during the duration of the transaction depends on the receipt of a payment by MMAI-I from the Bank at that date under the collateralized financial contracts between MMAI-I and the Bank and the repayment of an equivalent amount by MMAI-I to the Trust under the Financial Contract, whether Unitholders will receive the targeted distribution and subscription price repayment is dependent upon the financial health, rating and creditworthiness of the Bank and MMAI-I.

Creditworthiness of the Reference Obligations

The credit ratings of the Credit Exposures are those of S&P and/or Dominion Bond Rating Service Limited ("DBRS"), as applicable, and the credit ratings of the Reference Obligations are those of Moody's Investors Service, Inc. ("Moody's"), S&P, Fitch, Inc. ("Fitch") or DBRS, which have investigated all or some of such Reference Obligations. Credit ratings on such Reference Obligations are not a recommendation to buy, sell or hold investments, and may be subject to revision or withdrawal at any time by the relevant rating agencies. While the Credit Exposures are rated by S&P and/or DBRS, as applicable, the Units are not rated by any rating agencies. Although some information with respect to Reference Obligations may be available from publicly available sources, no representation is made with respect thereto by the Trust, the Co-Trustees, MMAI-I or any of their respective affiliates as to the accuracy or completeness of any such information.

Fluctuations in the NAV of the Units

The NAV of the Units will vary according to a number of factors that are not within the control of the Trust, MMAI-I or the Bank including general market conditions, the performance and creditworthiness of the Reference Obligations, the Credit Exposures and the Permitted Investments. The NAV of the Units will also be influenced by a reduction in the monthly distributions on the Units, the cost of the senior debt issued by MMAI-I and the ability of MMAI-I to issue such debt, any downgrades of Reference Obligations in the Portfolio and the Aggregate Loss Determination Amount.

No Recourse to the Reference Obligations, Portfolio and Credit Exposures

The intention to make Monthly Payments is an intention of the Trust and the obligation to redeem the Units on the Expected Maturity Date (or the Legal Maturity Date, as applicable) is an obligation of the Trust. Unitholders will not have, and the Units will not represent, any proprietary interest whatsoever in the Portfolio, the Reference Obligations or the Credit Exposures. Accordingly, Unitholders will have no recourse whatsoever,

directly or indirectly, to the Portfolio, the Reference Obligations or the Credit Exposures to satisfy amounts owing to them by the Trust. The Trust itself will not have any proprietary interest in, or charge on, any of MMAI-I's assets under the terms of the Financial Contract or any other agreements.

None of the Co-Trustees, MMAI-I, the Bank or any of their respective affiliates, any Unitholders or any of their respective owners, beneficiaries, agents, officers, directors, employees, affiliates, successors or assigns will be personally liable for the obligations of the Trust in respect of the Units.

Disqualification as a Mutual Fund Trust

If the Trust does not qualify as a mutual fund trust within the meaning of the *Income Tax Act* (Canada) (the "Tax Act"), the amount received by the Unitholders from the distributions made by the Trust could be treated differently under the Tax Act and, accordingly, be considered taxable income. In addition, there could be other adverse material tax effect on the Unitholders.

Fluctuations in Monthly Distributions

There can be no assurance that the Trust will be able to maintain the monthly distributions to the Unitholders should Credit Events occur. The eventual occurrence of Credit Events will decrease the monthly distributions to be paid to Unitholders.

Forward-Looking Statements

This annual information form contains "forward-looking" statements within the meaning of securities legislation which are based on certain estimations and expectations. Statements that are not historical facts, including statements about assumptions and expectations from management of the Co-Trustees, are forward-looking statements. Such statements are subject to potential risks and uncertainties, and actual results could therefore differ materially. The Co-Trustees' management undertakes no obligation to publicly update any forward-looking statements to account for any new information, future events or other factors.
